

 JETSUITE

JetSuite's Phenom 100s from Embraer, the world's newest and most fuel-efficient light jets, comfortably seat up to four in their BMW-designed cabins. And if that's not enough, here's a little more about us. >

## WE LIKE TO TALK ABOUT OUR AGE

While many of our competitors operate with planes more than 10 years old, our fleet is the industry's youngest, and, because it's so new, the fuel efficiency is better than any other jet. Which cuts our costs, and in turn...

## WE'RE CHEAP, IN A GOOD WAY

That's right. We're half the price of the other guys. You know, the ones with the older planes.

## WE KNOW THE WORD PRECIOUS COMES BEFORE CARGO

With an average of more than 7,000 flight hours, our pilots are some of the most experienced around, because it's our priority to keep your precious cargo safe. And we aren't just referring to your snowboard, golf clubs or shopping bags (all of which can fit in our baggage compartment – the largest in its category - by the way).
